

AKHILA BODDU

Computer Science Engineer (AI ML) | AI Product Engineering | Python | Generative AI

Hyderabad, Telangana

akhila.b2906@gmail.com | +91 8688864241 | LinkedIn | GitHub

Professional Summary

Computer Science and Engineering (AI ML) undergraduate from JNTUH College of Engineering, Manthani with a CGPA of 7.15. Skilled in Python, SQL, Machine Learning, and Natural Language Processing through internships and academic projects. Currently pursuing AI Product Engineering training focused on Large Language Models (LLMs), Prompt Engineering, Generative AI, and AI-powered product development. Strong analytical, problem-solving, and communication skills.

Skills

- Programming Languages: Python, SQL
- Artificial Intelligence: Generative AI, Prompt Engineering, LLM Fundamentals
- Machine Learning: Logistic Regression, Random Forest
- Data Analysis: Pandas, NumPy
- Natural Language Processing: NLTK, TextBlob, Sentiment Analysis
- Database: MySQL
- Tools: Git, GitHub, VS Code
- Core Concepts: Data Structures, Algorithms, DBMS, OOP
- Networking: TCP/IP, DNS, Networking Fundamentals
- Cybersecurity: Security Fundamentals, Threat Awareness
- Soft Skills: Problem Solving, Communication, Teamwork, Adaptability

Education

JNTUH College of Engineering, Manthani

Bachelor of Technology in Computer Science Engineering (AI ML)

May 2026

CGPA: 7.15

Professional Training

AI Product Engineering Program – Rooman Technologies (Ongoing)

- Learning Generative AI and Large Language Models (LLMs).
- Developing Prompt Engineering skills for AI applications.
- Building AI-powered solutions using Python.
- Understanding AI Product Development workflows.

Projects

Text-to-Speech Converter

- Developed a Python application using gTTS and pyttsx3 for speech synthesis.
- Improved accessibility through automated voice generation.
- Implemented text processing and audio generation features.

Customer Churn Prediction

- Built machine learning models using Logistic Regression and Random Forest.
- Predicted customer churn using historical customer datasets.
- Performed data preprocessing and model evaluation.

Twitter Sentiment Analysis

- Developed an NLP-based sentiment analysis system using NLTK and TextBlob.
- Classified tweets into positive, negative, and neutral sentiments.
- Analyzed public opinion using NLP techniques.

Work Experience

Artificial Intelligence Intern – Cognifyz

- Worked on AI-based tasks using Python.
- Assisted in data processing and machine learning activities.
- Applied analytical thinking to solve real-world problems.
- Strengthened programming and problem-solving skills.

Python Projects Training – Code Technologies

- Developed mini Python projects to strengthen programming skills.
- Improved coding, debugging, and logical reasoning abilities.
- Gained practical exposure to software development concepts.

Certifications

- AI Fluency for Students – Anthropic
- Gen AI 101 – NASSCOM
- Microsoft Cybersecurity in AI Training Program (Ongoing)
- Artificial Intelligence Internship – Code Technologies
- Python Development Internship – Cognifyz

Achievements

- Strong problem-solving and analytical skills.
- Quick learner with adaptability.
- Effective communication and teamwork abilities.
- Passionate about Artificial Intelligence, Generative AI, Machine Learning, and NLP.
